DID YOU KNOW THAT...?

...there are more gadgets in the world than people? First, it was mobile phones. 2014 was the year when there were officially more mobile devices than people in the world. Three years later, Internet of Things (IoT) devices had outnumbered the world's population as well. According to analyst firm Gartner, the crossover point came when the number of IoT devices in the world reached 8.4 billion in 2017. Gartner predicts there will be more than 20 billion devices connected to the IoT by 2020.
