

# WOW

**CUSTOM MEDICAL PROTECTION WOWS**

# VIRUSES

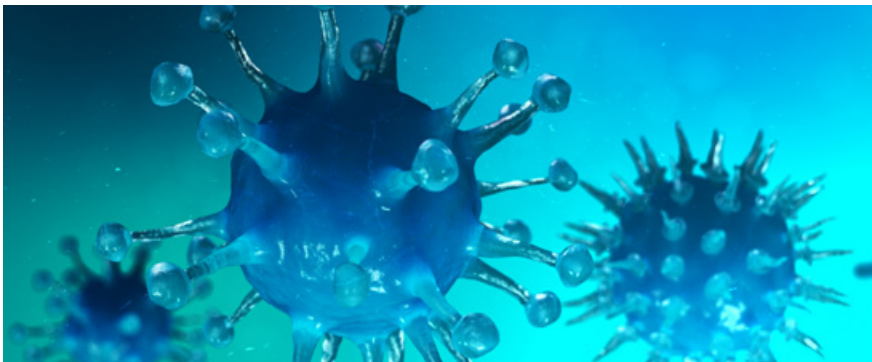

## What is a virus?

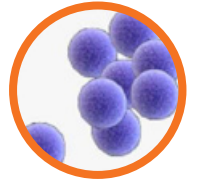

- Extremely small and infectious substances that reproduce by invading a living host cell. The host cell replicates and releases the new viruses which go on to infect other cells.
- Viruses usually infect specific cell types and most viruses infect only a few species of plants or animals; some infect only humans.

## What is an enveloped virus?

- Many pathogenic viruses are **enveloped by a lipid** (fatty) membrane.
- The lipid membrane protects the genetic material inside the virus and provides additional functions for cell attachment, morphogenesis and transmission.
- Enveloped viruses represent more **than 60% of all existing viruses** and include major human pathogens.
- Examples: **CORONAVIRUS**, human and avian influenzas, H5N1, herpes, hepatitis, and AIDS.

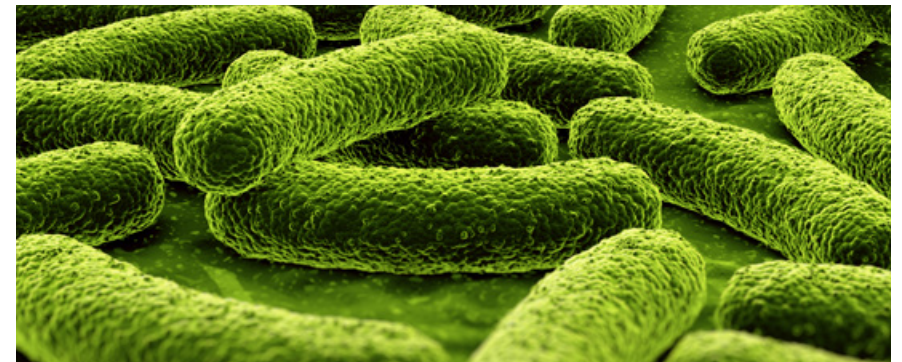

# BACTERIA

## What are bacteria?

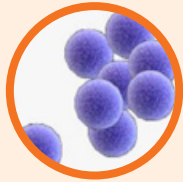

- Single cell organisms capable of rapidly reproducing by cell division.
- A natural part of the environment, and present in large numbers inside and on the outside our bodies.
- Most bacteria are harmless; however some bacteria can cause harmful disease.
- Bacteria can be broadly classified as gram positive or gram negative depending on the structure of the cell wall.
- Gram positive bacteria are primarily responsible for body odors:

Gram positive bacteria	Gram negative bacteria
<ul style="list-style-type: none"><li>· Staphylococcus aureus</li><li>· MRSA ("golden staph")</li><li>· MSSA</li><li>· Listeria monocytogenes</li><li>· etc.</li></ul>	<ul style="list-style-type: none"><li>· Escherichia coli</li><li>· Klebsiella pneumoniae</li><li>· Salmonella typhimurium</li><li>· Pseudomonas aeruginosa</li><li>· etc.</li></ul>

## TEXTILES OR OTHER SURFACES: A VECTOR FOR VIRUSES AND BACTERIA

### BACTERIA NEED 4 CONDITIONS TO SURVIVE & REPRODUCE:

Bacteria

Warmth

Fat & protein  
(from human sweat)

Moisture

Hosting surface

TEXTILES PROVIDE  
A LARGE SURFACE  
AREA FOR  
BACTERIA

### VIRUSES CAN PERSIST ON SURFACES AND REMAIN INFECTIOUS.

Viruses

E.G RESEARCH HAS SHOWN THAT THE HUMAN **CORONAVIRUS (SARS-COV)** CAN PERSIST  
**FOR UP TO 2 DAYS** ON SURGICAL GOWNS AT ROOM TEMPERATURE

- Antiviral and antibacterial textiles or disinfection products / pens / lamps can play a part in an overall strategy to address transmission of bacteria and viruses in sensitive environments.
- Preventing bacteria and viruses from contaminating textiles and other products/surfaces can play a role in minimizing opportunities for transmission.

## INFECTION & TRANSMISSION

- Many viruses and bacteria are pathogens that can lead to severe sickness and mortality.
- Thousands of deaths every year can result from transmission of pathogenic viruses and bacteria.
- Viruses and bacteria can remain active on textile or shared surfaces from days to months.

## BACTERIA IS A REASON FOR BAD ODOR IN TEXTILES

Synthetic fibers are generally perceived to be much smellier than natural fibers. By sweating we transport nutrients like lipids and sugars into textiles on which bacteria can feed and rapidly grow by doubling every 20 minutes. Bacteria cause bad odors and discomfort. The odor development is particularly strong on synthetic textiles, already after few hours.

# CUSTOM MEDICAL PROTECTION WOWS

## IMPRINTED MASKS FOR ACTIVE PERSONNEL

- Made of double-walled antibacterial OEKO-TEX fabrics, 100% polyester (140gr/m<sup>2</sup>) and 100% cotton (140 gr/m<sup>2</sup>).
- Can be personalized with client logo.
- Washable and reusable.
- Cover the mouth and nose to limit the germs spreading.

Minimum order: 50 pcs.

# CUSTOM MEDICAL PROTECTION WOVES

## FACE SHIELD WITH HAT OR CAP

Use this face shield to remain safe from viruses, while covering your head with a nice and functional accessory for outside activities. Can be made in any color, personalized at any color. UPF: 50+. Don't steam up. Good visibility. Easy to clean. Models for adults or children.

Minimum order: 300 pcs.

# CUSTOM MEDICAL PROTECTION WOVES

## FACE SHIELD

Faceshield with thickness of 400 microns or 700 microns, made of mono apert film. It can be disinfected, it doesn't steam up.

Can be personalized with client logo (please ask for additional costs).

Production capacity: 2000 - 4000 pcs/ day.

Packaging: 25 pcs.

---

Minimum order: 100 pcs.

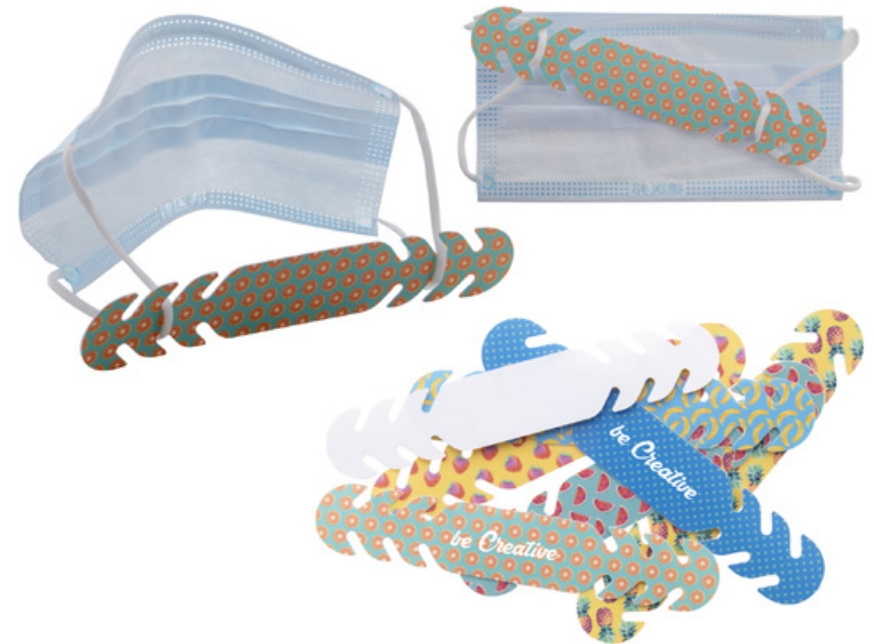

## EARSAVE FACE MASK EXTENDER

Makes the masks more easy to wear, to stay safe. Release your discomfort caused by the ear loops of the face masks. Custom made, full color printed face mask extender in PP plastic. With 3 positions for 8, 11 and 14 cm extension. In universal size for adults. Price includes UV-LED printing on one side.

---

Minimum order: 250 pieces.

## HOW TO USE IT

# CUSTOM MEDICAL PROTECTION WOVES

## HIGH QUALITY FACE SHIELD, 270°, ADJUSTABLE ON HAT, SPLASH-PROOF SAFETY PVC

- 1) Designed for keeping safe from viruses spread and the bacteria dust prevention.
- 2) 270° prevention from the droplets and pollution.
- 3) Can be used in hospitals, subway, bus, supermarket, office, on street.
- 4) Anti-fog, not liable to mist, effective isolation.
- 5) Breathable, adjustable.

Material: eco-friendly safety PVC

Size: 32\*22cm

Thickness: 2mm

Minimum order: 300 pcs.

### SUITABLE FOR KINDS OF HATS

## COOL NECK - COOLING TUBE

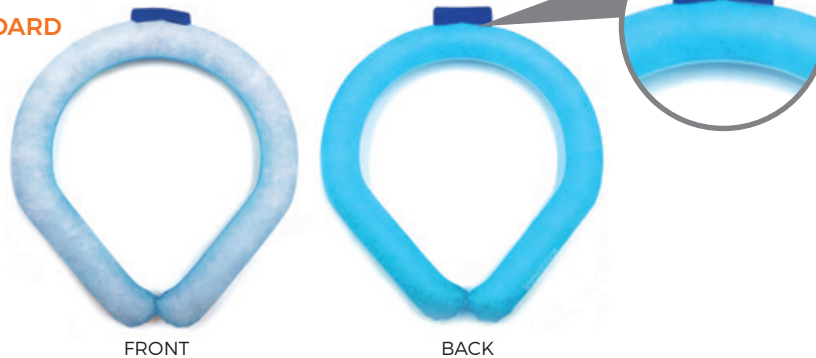

Cool Neck is a innovative cooling product, designed for outdoor sport such as jogging / running, mountain climbing; also it is good for outdoor workers. **It can also be branded with your logo.**

Keeps cool up between 30 and 90 minutes, at 25°C. You don't need to put Cool Neck into fridge to freeze. With patented PCM (Phase Change Material), we can set any solidify temperature between 5°C to 30°C. It will solidify when outside temperature low than 18°C.

Even in hot summer, you just need dip it into water or put in a room / car with air condition, it will solidify automatically. It will stay temperature 18°C to 20°C as long as it not melt. It helps your body cooling down and it is reusable. Optional, copper stretch fabric cover with anti-microbial, anti-odor function, fit Cool Neck very well.

Logo personalization on label: more than 500 pcs.  
Logo personalization on fabric: more 50 pcs.

### STANDARD

### FABRIC COVER OPTIONS

### MAIN FEATURES

- Reusable
- Non toxic, ecofriendly
- Easy to use
- Cool design

This product includes **PCM (Phase Change Material)**, a material that stores or emits a large amount of heat energy through a kind of physical change process that changes from one physical state to another such as solid ▶ liquid, liquid ▶ solid, liquid ▶ gas, gas ▶ liquid state.

NASA developed the technology to prevent surface cracking of the space craft and to protect the astronauts from extreme temperature deviations.

# CUSTOM MEDICAL PROTECTION WOWS

## IPROTECT - ANTIBACTERIAL PEN WITH ZINC IONS

Pens are one of the worst culprits for spreading germs. The iPROTECT prevents spreading bacteria from hand to hand. It's the promotional pen for companies in the medical and paramedical industry, and it's also perfect for schools, public places, hospitals and bars.

Antimicrobial additives provide an extra layer of protection when combined with normal cleaning procedures.

### Why to use iPROTECT antibacterial pen with zinc ions:

- iPROTECT has effectiveness against the 99% of bacteria, i.e. Escherichia Coli and Staphylococcus Aureus
- It is not a surface treatment, the iPROTECT antibacterial action is water, scratch and UV proof.
- The antibacterial function of iPROTECT pen has been certified the Public Health and Microbiology Department of the University of Turin and by LEBSC Chemistry Department of the University of Bologna.
- iPROTECT has achieved the very demanding Standards required by the ISO 22196 (JIS Z 2801).

# CUSTOM MEDICAL PROTECTION WOWS

## LED PORTABLE UVC STERILIZER LAMP, STAINLESS STEEL

UV light intensity is stronger due to its focusing reflector design. Sterilization effect is better. More concentrated ultraviolet light.

Can be used to quickly disinfect masks, computers, keyboards, elevator buttons, personal items, eating and drinking recipient, water dispensers, anything used often, in house, office or public places.

Disinfection effect: 10 seconds, can kill 99,99% of bacteria and viruses.

Exquisite stainless steel casing.

Optimal exposure distance: 2-3 cm.

Material: Stainless steel.

Voltage: 3.7v

Rated Power: 3W

Led Type: UVC 280nm

Luminous Efficacy: 36lm/w

Lifetime: 10000 h

Battery Capacity: 450mAh Rechargeable battery

Battery: 2 pcs

Attachment: 1pcs USB charger; 1pcs charging data cable; 1pcs UV-proof glasses

Product weight: 400g

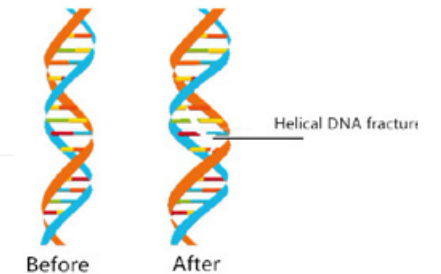

Certificate CE, ROHS,FDA.

Minimum order: 200 pcs.

## KILL BACTERIA, VIRUSES ARE THAT SIMPLE

Ultraviolet light destroys the DNA and RNA of microorganisms, making them dead or unable to reproduce, thus achieving the disinfection effect.

DNA HELIX

# CUSTOM MEDICAL PROTECTION WOWS

## UV PORTABLE STERILIZER WITH WIRELESS CHARGER

PROTECT you from viruses, STERILIZE your phone and CHARGE it!  
A must have sterilizer for your phone, as well for your mask, glasses, personal items.

### FEATURES:

1. Support different printing logo.
2. Support wireless charger, charge your phone anytime.
3. Support UV Sterilizer function, can use for mask, glasses, phones in daily life.
4. Exclusive design, meeting CE standard.

Color: blue or white  
Input: 1-2A  
UV wave length: 253.7MM  
Max phone size: 6.6 inch phone  
Rated voltage: DC 5V  
Disinfection power: 2W  
Aromatherapy power: 1W  
Dimensions: 230 x 120x35 mm

Minimum order: 100 pcs.

### WIRELESS CHARGING

### KILLING RATE 99.99% Ultraviolet disinfection, 5 minutes to kill germs

The 254nm wavelength of ultraviolet light is easy to be absorber by organism, destroy its DNA and kill bacterial and viral, which is a purely physical disinfection method without secondary pollution.

# CUSTOM MEDICAL PROTECTION WOWS

## MULTI-FUNCTION STERILIZATION WITH UVC LIGHT SANITIZER

**THIS UV-C LIGHT SANITIZER KILLS 99% OF GERMS ON YOUR PHONE!**

Press clean switch to start sterilizing while indicator light keeps blue.  
Machine will stop automatically after 5 minutes when clean is finished.  
Imprinting custom logo. Can do custom PMS color.  
Material: ABS.

180 x 110 x 55mm (outer dimension)

154 x 84 mm (inner dimension)

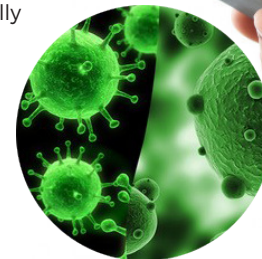

16mm (depth dimension)

Minimum order: 500 pcs.

## ELIMINATES 99.99% OF BACTERIA

You might know that "phones are with more bacteria than a human toilet". Cellphone is covered in germs and yucky bugs, so we need to protect ourselves and someone closest by sanitizing phone regularly. Vmax mobile phone sterilizer is scientifically proven & tested by independent third-party laboratories that kill 99.9% of common household germs in 6-10 minutes.

# CUSTOM MEDICAL PROTECTION WOWS

## SOCIAL DISTANCE ALARM BRACELET

### WHY SOCIAL DISTANCE ALARM?

The coronavirus can spread easily in crowd if peoples get close to each other within less than 1,5-2 meters distance. Social Distance Alarm device is proposed to remind peoples to keep safe distance.

### HOW TO USE IT?

1. Take out the device from rubber wristband.
2. Recharge the device by micro USB cable, then it is waked up to work.
3. Wear the device on wrist.
4. Go around, if you are too close to others who is wearing the same device, the device will vibrate. You can back steps to get longer distance, or turned your wrist back, or use your hand to cover your device, then the alert will stop soon automatically.
5. Recharge the device if it does not vibrate.

### HOW IT FUNCTION:

1. Install app "Distance Alarm" from Google play for Android phone.
2. Please allow all required permissions by App.
3. Turn on Bluetooth and location service of your phone, connect phone to internet.
4. Put device close to phone.
5. Click the 'Start' button to update your device. After update done, the device will restart and all new features are in working.

Wristband can be personalized with logo.

Minimum order: 300 pcs.

# CUSTOM MEDICAL PROTECTION WOWS

## PORTABLE UV STERILIZER, MINI UV LED, DEEP STERILIZER, VIRUS KILLER

Reasons to choose the deep purple UV sterilizer

1. Senior R & D team, results of more than 10 years of research
2. Officially confirmed that deep purple UV is one of the effective methods to kill the Corona Virus
3. Using three UVC-LEDs with a luminous power of 15mW, the disinfection dose generated is 36 times higher than the national standard
4. Good disinfection effect, up to 99.99%
5. Non-toxic, no residue, no odor, no secondary pollution
6. Small size, low energy consumption, carry it with you, ready for sterilization
7. UVC-LED service life is up to 500,000 times

Product description

1. This product uses three UVC-LED bulbs (Power: 5mW Wavelength: 275nm) that emit deep UV radiation to effectively eliminate bacteria and viruses. The product is eco-friendly, safe to use and has a long lifespan.
2. Ultraviolet germicidal irradiation is a means of physical disinfection. No byproduct, toxin, physical remain, odor or pollution will result from the product's use.
3. Research has shown that only UV light with 200-280nm wavelengths effectively destroys bacteria, viruses, parasites and other pathogens. Two prerequisites must be fulfilled: first, the UV wavelength must be within designated UVC spectrum; second, sufficient dosage must be fulfilled, calculated as such: radiant intensity x time / per unit area. The unit used is  $\mu\text{W.s/cm}^2$ .
4. According to the national standard, the dosage required to eliminate bacteria and viruses must be between  $10,000\mu\text{W.s/cm}^2$  (10,000 microjoule) and  $100,000\mu\text{W.s/cm}^2$  (100,000 microjoule). Our product works at a radiation power of 15 mW. When the distance between source and object is at 5mm, the exposed area approximately  $2.7417\text{ cm}^2$ , the radiant intensity  $4009\mu\text{W.s/cm}^2$ , and the exposure time 90 seconds, the dosage of the product is  $360810\mu\text{W.s/cm}^2$ . This is 36 times more than the required dosage, far exceeding the national standard.
5. The product is small, energy saving and easy to use. There is a built-in rechargeable battery. Fully charged, the battery sustains 30 uses.
6. The lifecycle of the Deep UV-led is over 500,000 uses.

Minimum order: 500 pcs.

# CUSTOM MEDICAL PROTECTION WOWS

## TOUCH-FREE LIQUID SOAP DISPENSER

TOUCH-FREE LIQUID SOAP DISPENSER PREVENTS CROSS CONTAMINATION!

STAY CLEAN AND SAFE IN PUBLIC SPACES. PROTECT YOUR EMPLOYEES AND YOUR CUSTOMERS!

Ideal for clinic tables, office desks, banks and companies front table.  
Customized logo & colors can be made at request.  
Top dispensing, no leaking.

### FEATURES:

1. Dispenser volume: 300ml
2. Unit size: 189 \* 104 \* 153 mm
3. Effective induction distance: 0-8cm
4. Adjustable dose.
5. Bottle: refillable or disposable
6. For all types: foam, alco-gel, lotion, disinfectant.
7. Alternative dose:
  - Foam pump: 0.3g - 0.4g
  - Gel/ liquid pump: 2.7g - 1.6g
  - Spray pump: 2.2g - 0.9g
8. Low power consumption: 4pcs Alkaline C battery can work 120,000 times (or 3 years, >100 filled bottles ).
9. Standard: CE & ROHS & PAH
10. Designed for tabletop & wall-mounted.

Minimum order: 500 pcs.

## PERSONAL DISINFECTANT MAKER

### DID YOU KNOW THAT NORMAL SALT + TAPE WATER = DISINFECTANT ?

You can have your own personal disinfectant maker, with disinfection rate of 99.9% of most kinds of viruses and bacteria.

It takes only 3 minutes to disinfect with simple salt and tape water, in this maker. Just press sprinkler head and atomization will be uniform.

Safe materials. CE, FCC, FDA certificated.

Minimum order: 100 pcs.

### BACTERIA ARE EVERYWHERE IT'S HARD TO PREVENT THEM

**NaCl+H<sub>2</sub>O**  $\xrightarrow{\text{ELECTRICITY ON}}$  **NaCl+H<sub>2</sub>↑**

SALT      WATER      DISINFECTANT

All you need is just normal salt and tape water, to make safe and harmless disinfectant, to protect you from virus and bacteria. Disinfectant containing chlorine is weak Alkali, and widely used for disinfection. Electrolysis of salt water can produce chlorine gas on the anode. And the same time, sodium hydroxide is produced in the solution. Chlorine dissolves in water and reacts with sodium hydroxide in solution to form sodium hypochlorite.
